

Nervous system cut and paste.

Biology 12  
M.Mazurkewich

Cut out the statements and words. Organize them into logical categories based on the organization scheme the text and your notes suggest. Paste onto ½ a posterboard then add lines or arrows to show the relationships. You are encouraged to add words and other things that will help you understand and remember.

<b>Noradrenalin &amp; Norepinephrine</b>	<b>Relaxed state</b> [promotes digestion, relaxes pupils, retards heart rate.]	<b>Fight or flight response</b> [inhibits digestion, dilates pupils, increases heart rate]
<b>Acetylcholine</b>	<b>Parasympathetic</b>	<b>Sympathetic</b>
<b>Autonomic</b>	<b>Peripheral nervous system</b>	<b>Reflex arc</b>
<b>Muscle nerves</b>	<b>Somatic</b>	<b>Sensory neurons</b>

<b>Central nervous system</b>	<b>Brain</b>	<b>Conscious</b>
<b>White matter</b>	<b>Grey matter</b>	<b>Spinal cord</b>
<b>Cerebrum</b>	<b>Corpus callosum</b>	<b>Frontal lobe</b>
<b>Temporal lobe</b>	<b>Parietal lobe</b>	<b>Occipital lobe</b>
<b>Cerebellum</b>	<b>Thalamus</b>	<b>Hypothalamus</b>
<b>Unconscious</b>	<b>Medulla oblongata</b>	<b>Cranial nerves</b>
